Auto This cycle detects soil quantity and water purity and optimizes washing for the best cleaning. Intensive This cycle is for heavily soiled foods and meals with hardened soil. A heavy cycle is the default for the strongest spray intensity and is used to wash heavily soiled dishes. Delicate Use this cycle to clean fine items such as fine porcelain and stemware. Eco Eco provides the most energy efficient and low water consumption for good washing performance under normally soiled loads. The ecological cycle and the energy saver option are suitable for normally soiled loads. Turbo This cycle will clean moderate dishes in an hour using a little more energy and water. Extra Dry is set as the default. If you do not want to dry the dishes after washing, turn off Extra Dry. Download cycle Use dedicated cycle to download via Wi-Fi or NFC. Default cycle: P1. Pots and pans Cleaning the machine This cycle is for cleaning the inside of the device. Use this cycle without dishwashers. Rinse This cycle is a quick rinse only for dishes that are not immediately washed. Do not use any detergent. Express This cycle quickly cleans easily soiled dishes. This cycle does not have drying. Dual Zone options This option automatically adjusts the spray intensity to soft for the top arm of the nebulizer and strong for the nebulizer's lower arm. Half Load This option is intensively washed by selecting the upper or lower racks. Under low load, use only the upper or lower stand to save energy and time. The washing time is increased to maintain washing performance. High temperature Increase the main washing temperature to improve cleaning. Extra Dry Select Extra Dry for better drying performance. When the rinsing is empty, Extra Dry is automatically selected. Delay Start Start Function delay the start of the selected cycle. Each time you press the Start delay button, the delay time is increased by 1 to 12 hours in one-hour increments. Control Lock control helps prevent changes to settings during the cycle. In choice of this lock, all buttons on control panel except the power button. This function does not lock the door. To start a new cycle, deactivate the control lock. Wi - Fi Press and hold the Start delay button for about 3 seconds to connect to the network. For details on this function, see SMART FUNCTIONS. [Logo] LG: Life's Good *Requested Question Operation Dishwashers 07/10/2018 Print Email Copy Link [Logo] LG facilitates [Name] To increase the drying of the dishwasher and prevent water stains, use the rinsing connection system for each washing cycle. For model numbers: LSDF9963ST, LTD786SST, LDP778SST, LP5676BD, LTD5665ST, LDF5545ST When the rinsing aid level is low, the rinsing icon will flash on the control panel to let you know it's time to add a rinse. Find the rinsing dispenser on the inside door of the dishwasher. Lift the flap to open the dispenser lid, and then fill the dispenser to the maximum level of filling with the rinsing device. Avoid overfilling. Make sure that the liquid rinser settles during filling to prevent air bubbles. After filling the dispenser, close the lid firmly until heard a click. Wipe all spilled rinsers around the dispenser. To set the level of the rinsing machine, turn off the dishwasher while pressing the Power and Double Zone buttons. Press the Delay Start button repeatedly to select the rinsing level. [Rinsing aid levels range between LO and L4.] After selecting the desired level of rinsing, press the Start button to save. If hard water causes calcium to build up on dishes, or if you notice spotting or water spotting on dishes and poor drying performance, increase the level of the rinsing. Using too much rinsing can cause foaming or filming dishes. If this occurs, lower the level of the rinsing. Accordingly, you will need to adjust the rinsing. The rinsing icon turns off automatically when the rinsing is refilled or the dose level is set to 0.
